Education

Harvard University

Cambridge, MA

B.A., Computer Science & Statistics (Honors). Minor in Mathematics. GPA: 3.72.

May 2025

Senior Thesis: *Cross-Market Signals: Economic Spillovers Across Markets*

- Modeled U.S.-China equity spillovers using ML and kernel regressions on 153 JKP factors, explaining up to 70% (U.S.) and 60% (China) variance; uncovered asymmetric information flows.

Activities: Co-led VeritasGPT (a Harvard AI Agent), worked on 6 consulting cases, led a team that sourced \$550k in consulting cases in 4 weeks, researched quantum investment opportunities for NATO.

Experience

Synthian

Remote

AI Software Engineer

Aug 2025 – Present

- Building a cross-platform communication tool for adults with speech challenges, delivering real-time transcription, simplified meeting notes, AI-powered reply suggestions, and text-to-speech.

Comcast

Philadelphia, PA

Finance Intern

May 2024 – May 2025

- Developed an internal chatbot using Python's Azure OpenAI API, integrating database connections and management, file search, and data analysis and visualization.
- Initial testing with equity-based compensation analyses reports increased efficiency by ~93%.

Curious Cardinals

Remote

AI Mentor

Oct 2023 – Current

- Mentored Robert Jain (CEO of Jain Global, hedge fund with \$5.3bn AUM) in the basics of AI and the currently available AI tools and developed a news analyzer app to consolidate his readings.
- Taught Stephen Freidheim (CIO of Cyrus Capital Partners, hedge fund with \$3.5bn AUM) about AI research tools, office productivity tools, and AI agents through the OpenAI Playground.
- Working with Carola Jain (CEO of DMINTI) on integrating AI within her workflow and using it to solve various tasks at her company, including transcribing interviews.

Harvard Consulting on Business and the Environment

Cambridge, MA

Board Member

Jul 2021 – May 2023

- Led a team of 28 that sourced \$550k in 4 weeks; trained them on outreach, sales calls, & SOWs.
- Organized analyst trainings on business and industry analysis models, including Porter's Five Forces and SWOT analyses, as well as creating MECE recommendations.
- Consulted on six strategic cases, ranging from market analysis of cancer therapeutics (competitor trials, patent landscapes, U.S. and European go-to-market strategies) to banking customer-trust initiatives (risk assessments, breach-response planning, and UI-UX redesign).

Projects

VeritasGPT

May 2024

- Co-led the development of VeritasGPT, a Harvard AI agent integrating RAG and function calling to access real-time campus data on course catalogs, dining menus, and shuttle timing.
- Engineered prompts and retrieval pipelines to improve context awareness and accuracy.
- Led the Python backend and vector database development, deploying a demo of core features.

Skills

Technical: Consulting, Python, Linux, SQL, Azure Services, OpenAI, Workflow Optimization
